Rapra Abstracts provides comprehensive coverage of the world's polymer literature selected from a wide range of international publications, including over 400 periodicals, conference proceedings, books, trade and technical literature, standards, patents, and government publications.

Each month approximately 2000 new abstracts are added to the database which is maintained as a computer-held file dating back to 1972. In addition to the *Rapra Abstracts* journal a variety of other services are available including:

Rapra Extracts: a fortnightly print-out of abstracts based on your personal requirements.

On-line Searches: either using your own terminal through Pergamon Orbit InfoLine, or for those unable to implement their own searches the Rapra Search Service will undertake searches on your behalf.

Magnetic Tape Leasing: available for in-house production of information services.

Further information on these services is available from Rapra or Pergamon Press plc.

Rapra Abstracts is compiled and edited by Rapra Technology Limited and distributed by Pergamon Press plc.

Rapra Abstracts is published monthly with an annual index.

At Maxwell Online we have one simple but ambitious goal... to be the international leader in online services specializing in patent, biomedical, scientific, and technical information. To achieve this goal, we're combining the forces of today's two most innovative online information services companies—

***ORBIT Search Service
and
BRS Information Technologies***

ORBIT and BRS have been providing superior online services for over 16 years. Together, they offer nearly 300 of the highest quality databases, and service more than 60,000 active passwords worldwide. That, combined with an unwavering commitment to customer training and support, makes the ORBIT/BRS team a unique source for your online information needs.
